Dear Dr. _____

I am working here as Professor of Zoology from December, 1950 after leaving the Malaria Institute of Pakistan, Karachi. I am sending the reprints of recent papers on "Fleas and Plague. While at the Haffkine Institute, Bombay I did work on the effect of DDT on fleas both in jar and burrow conditions. It is almost ready and will be sent for publication in the bulletin of World Health Organization. I shall be grateful if you send me the reprints of your all papers and of those working under you. These will help me in my work on fleas at this place.

With all best wishes,

25X1X6
Yours sincerely,
